

PRODUCT INFORMATION

PROTECTIVE MASKS

DISPOSABLE MASKS

Disposable Masks come in either fold flat or if preferred moulded versions. We offer masks for protection against dusts and water based mists which covers protection when using with silica dusts or plaster dusts. P2 offers intermediate protection, which we suggest is suitable for plaster dusts. P3 offers protection for silica dusts, which includes clay dust etc.

6424/1 – DISPOSABLE FOLD FLAT DUST MASK – P2 – V420SL

- Use for protection against plaster dusts, other fine dusts, oil and water based mists.

- Features a fully adjustable 4-point harness.

DUST MASK RESPIRATORS

A versatile range of half masks for many applications. These extremely popular half masks feature soft moulded rubber face piece. The user has a choice to fit a full range of replaceable filters providing excellent protection against a wide variety of fumes and vapours as well as those for toxic dusts. Combination filters are also available for protection against dust and fumes. The filter cartridge is mounted in a forward position. All models feature a clip-on pre-filter cap. All filters are offered separately to the mask.

6423 – DUST MASK RESPIRATOR – R300

- Filter hold front mounted.
- Standard rubber harness.
- Conforms to EN140.
- Single filter version (supplied without filters).

6423/1 – FILTER – P3 – TOXICDUSTS & FUMES – R315

- Toxic dusts and fumes.
- Recommended for protection against dusts that contain silica.

6423/2 – PRE-FILTER – R310

- Pre-filter pads (not for use with combination filters).
- Sold in packs of 5.

6423/3 – FILTER – P2 - ORGANIC VAPOURS & DUST – R326

- Organic vapours and dusts.

6423/4 – FILTER – P2 – TOXIC DUSTS & FUMES – R314
