VELVET COLOURS

All colours in the Velvet Series are AP NON-TOXIC. AMACO® Velvets semi-translucent underglazes offer two finish possibilities. When left unglazed they have the appearance of velour or velvet. They will intensify in colour when covered with a transparent gloss glaze. Velvets 380-384 have a unique formula that makes them very versatile. They can be used in detailed design work as a Cone 05/06 underglaze or they can be fired up to Cone 6 and maintain their intensity and brightness. All the Velvets are very rich colours and can be used for an all over coverage similar to an opaque underglaze. They fire true to colour as applied from the jar and may be intermixed to create a palette of hundreds of colours. The colours may be brushed on greenware which is to be bisque fired before applying a covering glaze or bisque, then a covering glaze applied. For opaque coverage by brushing, the consistency of the colour in the jar is correct. Velvets tolerate a wide firing range with recommended firing temperature being that of the clay used.

NOTE: V-317 Medium Pink will change colour and blister at Cone 5. V-303 Terra Cotta will fade away when glazed over. If you need to use this colour and glaze it, then substitute with V-366 Teddy Bear Brown. Velvets were developed to be used without a glaze cover. They should not be used on surfaces which come into contact with food or drink. Tableware producers must have all finished ware tested and approved as safe for dinnerware through a certified laboratory due to possible variations in firing temperature and possible contamination. Velvets are available in 59ml and 473ml jars.

Also available in our colour range are Underglaze Pencils, Underglaze Pens, Cafe Colours, Funstrokes, Ee-Zee Strokes, Design Colours and Rainbow Multi-colours & Ultra Stains(Powder)
