PLEASE NOTE

Your order cannot be fully processed until the completed questionnaire is returned to us. A final price for delivery is based on information within this questionnaire.

Unless you wish to collect, we will deliver the kiln using our own transport and notify you of the delivery date in due course.

Please note our responsibility ends with the delivery of the kiln to the address specified. The drivers are encouraged to be helpful and may position the kiln on site if adequate assistance is provided to negotiate doors, passages, stairways etc. It must be understood however that once the kiln has been off-loaded additional assistance is given at the customer's own risk. We provide equipment for offloading the kiln and transporting to the ground floor.

Delivery is made on the assumption that the chosen site and access has the approval of your architect/builder/electrician relative to the standard and type of building etc. If we consider it impossible to place the kiln in the position selected, our responsibility ends with the delivery of the kiln to your door. Should we need to return at a later date, to assist with installation and or test the kiln, additional cost will be incurred.

Should you have any difficulties with any of the conditions stipulated or in completing the enclosed questionnaire please do not hesitate to contact us.
