## PRODUCT INFORMATION

### 7121 – LINCOLN ELECTRONIC

---

The Lincoln Electronic Wheel has been developed to provide a throwing wheel with unrivalled power. It is a low-format design, constructed using a steel chassis with fibreglass outer case. The splash tray is made from moulded polypropylene. A strong .5hp motor powers the latest designed electronic speed control, enabling a smooth transition of speed and unbeatable torque across the speed range of 0-280r.p.m. A unique feature is the ability to reverse the direction of rotation at speed by the flick of a switch. A 12in. wheelhead is fitted as standard together with a fully adjustable padded seat. There is also facility to adjust the tension of the foot pedal for comfort and maintenance of pre-set speeds.

A new option, at no extra cost, is a roaming foot pedal.

Motor: 0.37kW (.5hp)

Bearings: Axial ball bearing sealed for life

Splash tray: Mould polypropylene

Wheelhead: 12in. diameter Aluminium

Construction: Electrical welded steel chassis with mould fibreglass body

Speed range: 0-280r.p.m.

Dimensions: 530mm wide x 1060mm long x 685mm high approx.
