PRODUCT INFORMATION

7210, 7211, and 7213 - SLAB ROLLER – 3ft, 4ft, & 3ft Bench Top

The Clayman Slab Roller has been designed to provide extremely efficient and reliable methods of producing slabs of clay for hand building or tiles. It has been designed using vast experience in slab roller production and incorporates a rack and pinion drive system eliminating the need of maintenance from troublesome wire driven systems, the design allows for infinitely variable thickness of clay to be rolled by means of adjustment of the main roller using a simple threaded adjuster that allows for fine adjustment whilst keeping the equal distance above the table across its length. The large single roller is made of a rust proof material to avoid corrosion or contamination of the clay. The slab roller has fully collapsible legs so it can be easily transported and comes complete with a set of high quality rolling cloths.

Technical Data:

Overall Dimensions:

7211 – Slab roller 4'

1090mm high x 820mm wide x 1220mm long

Weight: 70kg approx

Slab Size: 1020mm long X 470mm wide

7210 – Slab Roller 3'

1090mm high x 820mm wide x 920mm long

Slab Size: 720mm long x 470mm wide

Weight: 60kg

7213 – Slab Roller 3' Bench Mounted
4700mm high x 820mm wide x 920mm long
Slab Size: 720mm long x 470mm wide
Weight: 55kg

Please note slab size can only be given as a approximation due to the different natures of clay used.
