PRODUCT INFORMATION

6608 – PAINTEC SPRAY GUN

Introducing the new Paintec hand operated spray gun. The simple, but cost effective way to spray glaze and colours. The Paintec Sprayer has been developed especially for potters, with the finest quality plastic and bronze components to assure chemical resistance. What makes this item stand out?

- ECONOMICAL
- ADJUSTABLE
- SPRAYS CONTINUOUSLY
- NO COMPRESSOR REQUIRED
- NO POWER SUPPLY REQUIRED
- LIGHT & COMFORTABLE TO USE

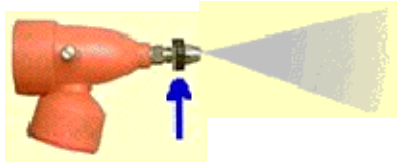

The Sprayer is supplied with a 0.6mm nozzle as standard, which enables glaze to be sprayed that has passed through an 80's mesh sieve and colour that has passed through a 120's mesh. Larger nozzles are available as optional extra. How to use the Paintec Sprayer? Simply pump four or five times to start to spray, then pump from time to time to maintain a continuous pressure thanks to an exclusive stainless steel retention valve. The pressure pump is designed to obtain maximum pressure with minimal effort.

NO POWER SUPPLY REQUIRED

No electricity or batteries are required. It can be used anywhere, at any time and is very quiet in use. Although it is not necessary to use the Paintec with a compressor it is possible to connect to a compressor if required (optional extra required)

ADJUSTABLE

The spray pattern can be adjusted by rotating the nozzle to go from a fine spray to a wide coverage.

SPRAY SMALL AMOUNTS

Also included with the Paintec Sprayer is an additional small container that drops into the main tank and provides the means to spray small amounts of colour. This container is provided with a clip on lid to enable storage of colour. Extra small containers are also available.

OPTIONAL EXTRAS

- 6608/1 0.8mm Nozzle
- 6608/2 1.0mm Nozzle
- 6608/3 1.2mm Nozzle
- 6608/4 Small Container
- 6608/5 Compressor Connecting Kit
